

# Antibakteriální roztok na nehty

Zabíjí 99,9% bakterií a plísní nehtů, vysoce účinný proti onychomykóze a houbovým infekcím.

The advertisement features a light blue background. At the top, two buttons read '3 SECONDS SPEED UP' and 'SMEAR 7 DAYS'. Below them, the headline 'JAPANESE ION STERILIZATION IT IS ENOUGH' is displayed. A sub-headline states 'SIMPLE AND EFFECTIVE APPLICABLE TO ALL KINDS OF PROBLEMS'. On the left, four blue arrows point to the following benefits: 'ANTIBACTERIAL AND ANTIBACTERIAL', 'NOURISHING ROOTS', 'SCIENCE MAJOR', and 'PAINLESS AND FAST'. In the center, a smiling male doctor in a white coat and glasses stands next to the product packaging. The packaging includes a box with '7天 去灰指甲' (7 days grey nail removal) and a bottle labeled 'V-CHEL'. Below the box and bottle are two small images of hands and feet, labeled 'HAND' and 'FOOT'. The product is described as 'GREY & CLEAR TRANSPARENT LIQUID' and '10ml 0.35FL.OZ.'.

Cena: **160,-**

10 ml

## Instrukce:

- umyjte nehty, které je třeba ošetřit, teplou vodou (chvilku namočte v teplé vodě)
- odšroubujte víčko, na bavlněný tampon nakapejte přiměřené množství roztoku a rovnoměrně jej aplikujte dvakrát denně na onychomykózu
- používejte alespoň 2 měsíce, dokud se šedé nehty neobnoví v hladké, růžové, zdravé a lesklé

## Pozor:

- nepoužívat na poškozenou (zraněnou) kůži
- tento produkt není vhodný pro těhotné
- pokud se objeví alergie, přestaňte v užívání produktu
- tento produkt je výhradně k zevnímu užití, vnitřní užití je zakázáno
- neaplikujte na sliznice a do očí
- uchovávejte na chladném a suchém místě, mimo dosah dětí

## WHAT IS ONYCHOMYCOSIS

Hyperthyroidism, commonly known as "nail nails", refers to diseases caused by Pichia bacteria invading the deck or under the arm. Onychomycosis is an infection caused by fungi such as dermatophytes, yeasts, and non-sclerotium. A common type of fungus: fungal white nail (superficial white onychomycosis) This type of lesion is limited to one or a tip of the nail surface, under the fungal disease, and is divided into a remote lateral type, a proximal subtype, This type of disease begins on either or both sides of the nail, and infection occurs under the deck.
